Cooling Top

Extension creates more space

KÄNGABOX® accessories
Cool Pack, Hot Pack, Cooling Top,
Extension and Trolley

Cool Pack keeps your cold chain safe in all circumstances: professional cold food links, medical products transportation, autonomous cold, cold buffets.

Cooling Top is the best place for cool packs. Set it on the box, put a cool pack and close the box.

Hot Pack gives back a long-lasting heat temperature by melting calorific liquid contained in the red plate. For hot food transportation and to warm insulated container.

Extension increases the height to get more volume.

Trolley for easy transport of heavy or stacked thermoboxes. Fits great for KÄNGABOX® Tower.

- Hot Pack as an alternative to electric heat plate
- Hot Pack does not require power supply
- Heat Hot Pack 40 minutes before use in a horizontal position
- Freeze Cool Pack 24 hours before use in horizontal position
- Cool Pack should be placed in the Cooling Top, so that the cold can fall down
- Depending on the temperature range choose the right Cool Pack
- Extension increases the KÄNGABOX® and creates more space
